

PROJECT

My Project Description

- I Developed one Project about E-commerce platform.
- It is about Furniture mall. It's represent all types of Furniture products.
- In that project customers can easily view and see all types of furniture models.
- If customer have any compliant about their purchased model that time they can easily write complaint.
- Customers can see their product's warranty time period.

- I used Html5, Css3 and JavaScript and also add some animation effects.
- I faced some challenges while I was doing this project.
- I want to share with you one challenge which I faced in this project.
- Challenge is about animation effects and grid area .
- I can't set animation effects and images in grid area.
- That time I search my query on W3school portal.
- I get solution from that portal, solution is about brackets and grid area numbers.

- After I getting solution, I done changes in Vscode file.
- These types of challenges I faced and solving problems step by step and done my project.

Thank you
